Wide-angle

WDR (Wide dynamic range) + Smart night vision Even in darkness or backlight, you can view brighter details.

WDR technology, F2.1 large aperture, the outdoor camera transfers more delicate image and video even in darkness or backlight. The outdoor camera permits you to see clearly even in darkness, night vision distance up to 7m.

▲ Smart night vision

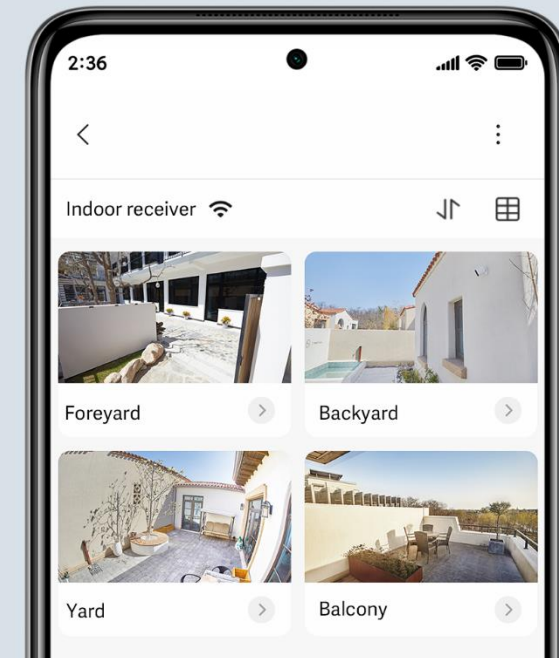

▲ WDR (Wide dynamic range)

Night Vision

1 receiver supports up to 4 cameras 4 cameras working simultaneously, effectively reduce blind spots

Multiple cameras are online at the same time, recording every corner of the house from all angles. You can view four images from your phone, or tap single image to view clearly, stay apprised of the situation in various parts of your house.

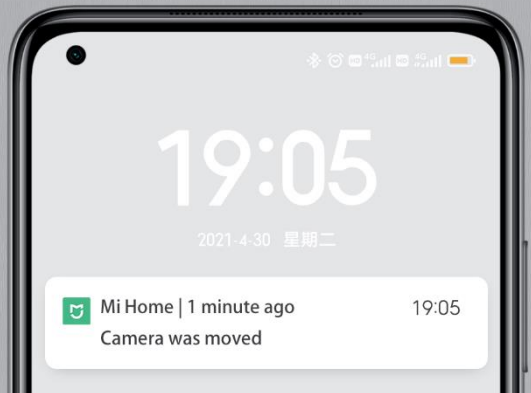

Multiple views

Product Features ②

Anti-theft base design Illegal touch, real time alert

The outdoor camera adopts the anti-theft screw structure and has a built-in gyroscope. When the camera body is detected to be abnormal, it will promptly send warning information to your mobile phone, and you will know the safety condition immediately.

Anti-theft

PIR human detection smart tracking, real time notification

Perceive temperature changes and object movements within 7m, start recording and push alarms immediately.

Motion Detection

Indoor Receiver Multiple storage methods for you

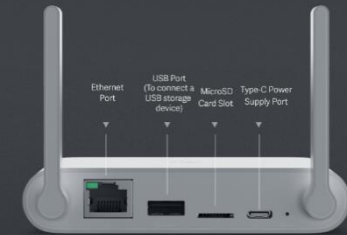

The video storage of the indoor receiver, prevents the leakage of record information. MicroSD card, USB mobile storage device, cloud storage available* three ways to meet the needs of footage storage. With a new generation of H.265 video encoding technology, it reduces video storage space, and under the same network conditions, the connection is more stable and the video is smoother.
